# One size doesn't fit all when it comes to underwriting.

PLUS is designed to underwrite Protective® Classic Choice term, Protective Custom Choice<sup>SM</sup> UL, Protective Indexed Choice<sup>SM</sup> UL and Protective® Lifetime Assurance UL applicants using a faster and less invasive process. Using advanced analytics, our flexible solution can streamline the experience for each applicant based on their individual circumstances.

## Key benefits of PLUS:

Fluids and APSs may not be required

Underwriting interview conducted by Protective employees

Application cycle time reduced by 14 days

All cases facilitated via Protective's automated underwriting platform to optimize speed to issue

## How our process works:

- Within 24 hours of the application being submitted, the customer will receive a call to complete their TeleLife® interview. At the beginning of the interview, the customer will be prompted to provide HIPAA and CRA authorization.
- During the TeleLife interview, PLUS gathers the required data. Along with the application disclosures, PLUS uses the data to determine the underwriting requirements and the best available class for the applicant.
- Application package sent out for signature.
- At the end of the TeleLife interview, you can expect the customer to follow one of these paths:

**Accelerated underwriting:** The need for an exam and labs is eliminated, and the policy is ready to be issued.

**Traditional underwriting:** Exam, fluids, labs and/or medical records are required to ensure accurate underwriting.

Some customers may appear to be eligible for an accelerated underwriting offer, but will still be required to complete the exam and labs. The need for an exam and labs could be from the underwriting data gathered (for example, prescription drug reports), a disclosure by the applicant, or a combination of factors. Even if the customer does not get an accelerated underwriting offer, they could still qualify for the best class through the exam and labs underwriting.

Accelerated underwriting cases will be monitored post-issue to confirm the disclosures provided by the applicant. Information gathered via accelerated underwriting cases may be reviewed and addressed with the customer if we discover any material differences.

The checklist below will help you determine if a customer may qualify for PLUS, possibly eliminating the need for fluids and APSs.
