# **QUOTING GUIDE**

## Common medical conditions and non-medical risks

Protective refers to Protective Life Insurance Company and Protective Life and Annuity Insurance Company. For Financial Professional Use Only. Not for Use With Consumers. This guide is designed to assist you in obtaining a preliminary quote prior to submission of an application. It includes a list of common medical conditions and common non-medical risks. Each medical condition and risk includes a brief definition and a set of questions to ask your client to help you obtain the essential details required for a preliminary quote.

For your convenience, preliminary quoting requests can be submitted directly to the Allstate Quick Quote email at Allstate.QuickQuote@protective.com.

When you click on the conditions on the following pages an email form will open up to help make contacting Underwriting even easier.

# XRAE®

XRAE is a field underwriting tool that's designed to help you quickly evaluate customers' medical conditions against our underwriting rules. For customers with more complex medical histories, XRAE will also indicate to submit it as a Quick Quote to our underwriting team. It's a great way to get a quick evaluation and help set realistic expectations with customers.

For Financial Professional Use Only. Not for Use With Consumers.

### Some general quoting advice:

If Underwriting provides a range of possible outcomes for a particular condition (i.e., table 2 to 4 for history of diabetes), consider quoting at the high end of the range. This will offset the possibility that the applicant may not meet the best case scenario after review of the formal underwriting requirements. We extend this same advice when quoting individuals who may not have any significant medical conditions. For example, rather than quoting the best class of Select Preferred, quote Preferred or even Standard rates. If there happens to be an unexpected finding on the lab results (i.e., elevated cholesterol or liver enzymes), the more conservative quote may help you deliver the policy.

Medical condition	Details for quote
Alcohol abuse:	• Date of last drink?
Alcohol use disorders include alcohol abuse and alcohol dependence (alcoholism). Associated with	• Reason for stopping?
	<ul> <li>Inpatient or outpatient treatment?</li> </ul>
adverse impact to health as well as social, occupational and legal concerns.	• Member of AA?
	<ul> <li>Motor vehicle violations or accidents in the past 5 years?</li> </ul>
	<ul> <li>Currently taking any medications?</li> </ul>
Asthma:	• Date and age of diagnosis?
Lung disease characterized by reversible airway obstruction and hypersensitivity. Typical symptoms are wheezing, coughing and shortness of breath.	• Frequency of attacks?
	• Date of last attack?
	<ul> <li>Any ER visits or hospitalizations?</li> </ul>
	<ul> <li>Currently taking any medications?</li> </ul>
	• Current tobacco user or former user? If former, when did they quit?
Arthritis:	• What type (Rheumatoid, Osteo, Psoriatic, etc.)?
Inflammatory disease of the joints. Certain types are	• Do they have any limitations?
systemic (can cause problems in other organs).	• How many joints are involved?
	<ul> <li>Type of medication/treatment?</li> </ul>
	• Any history of surgery, or any surgery planned?
Atrial fibrillation (AF):	• Age of onset?
An irregular heart rhythm where the atria contract	<ul> <li>Is it chronic or paroxysmal (intermittent)?</li> </ul>
chaotically and a totally irregular ventricular rhythm. It can occur either paroxysmal (sudden, periodic attacks), or be chronic.	• If paroxysmal, what's the frequency of episodes? Date of last episode?
	• Type of treatment?
	<ul> <li>Are they on any type of blood thinner?</li> </ul>
	• Have any of the following tests been completed since the onset of AF — Echocardiogram, stress imaging, cardiac catherization? If so, what were the results?

Medical condition	Details for quote
Build:	• Current height and weight?
A person's height and weight. This can also be expressed as BMI (body mass index). Concerns related to being overweight include increased risk for developing high blood pressure, diabetes, coronary disease and sleep	• Amount of weight lost in the past year?
	• Reason for weight loss?
	• Ever had gastric bypass surgery?
apnea. Being underweight can also be a concern.	<ul> <li>Any other medical conditions?</li> </ul>
Cancer:	• Type and location of cancer?
Cancer and malignancy are interchangeable terms to describe a condition of invasive cellular growth with potential to metastasize (spread to other parts of body). Can occur in many parts of the body but common forms are breast, colon and prostate cancer.	• Date of diagnosis?
	<ul> <li>Pathology results (tumor size, stage and grade) if available?</li> </ul>
	• Did cancer metastasize/spread? If yes, to where?
	<ul> <li>Type of treatment (surgery, chemotherapy or radiation)? When did treatment end?</li> </ul>
	• Any recurrence of cancer?
	• Date of most recent cancer follow-up?
	<ul> <li>For prostate cancer, please provide PSA levels at time of diagnosis and after treatment completed.</li> </ul>
Coronary artery disease (CAD):	Date of diagnosis?
Blockage of blood flow in the arteries that supply blood to the heart. This can result in angina (chest pain) or	• Bypass surgery or angioplasty (with or without heart stent)?
myocardial infarction (heart attack) that may require	• Number of arteries affected?
surgical intervention.	<ul> <li>Any symptoms after surgery?</li> </ul>
	<ul> <li>Most recent blood pressure and cholesterol levels?</li> </ul>
	<ul> <li>Date of most recent cardiology follow-up?</li> </ul>
	<ul> <li>Currently taking any medications?</li> </ul>
	Current or prior history of smoking?
COPD/emphysema:	<ul> <li>Type and frequency of symptoms</li> </ul>
Chronic Obstructive Pulmonary Disease (COPD) is a term used to describe a variety of lung diseases that cause chronic or frequent airway obstruction. Chronic bronchitis and emphysema are two of the most common forms of COPD.	• Smoker or Nonsmoker? If former smoker, when did they quit?
	• History of hospitalization? If yes, provide date(s).
	<ul> <li>Results of most recent pulmonary function testing (PFTs).</li> </ul>
	• Type of treatment?
COVID-19: Disease caused by the newly emerged coronavirus	• Known contact with person who is COVID-19 positive in the past month?
SARS-CoV-2. Impact of disease can be wide ranging. Some people may be asymptomatic, some have flu-like illness and a small percentage have life threatening complications.	<ul> <li>Tested positive for COVOD-19? If yes, provide date of positive test.</li> </ul>
	• Full recovery and return to normal activities?
	<ul> <li>Hospitalization required? Date released from hospital?</li> </ul>
	• Any ongoing symptoms? If yes, please describe.

Medical condition	Details for quote
Depression/anxiety:	• Exact diagnosis and date?
Depression includes conditions like adjustment disorder, bipolar disorder and major depression while anxiety	Cause of depression or anxiety?
	<ul> <li>Dates of any hospitalization?</li> </ul>
include conditions like panic attack, agoraphobia and OCD (obsessive-compulsive disorder).	• Dates of any suicide attempts?
	• Any time lost from work?
	• Type of treatment, current medications??
Developmental disability:	Type of condition
An impairment of physical, learning, language or behavior that begins during a child's developmental period that may impact day to day functioning and usually lasts throughout adulthood.	<ul> <li>Level of intellectual functioning (IQ)?</li> </ul>
	<ul> <li>Any history of seizures? If yes, provide type, frequency and date of last seizure.</li> </ul>
	• Any other medical history (psychiatric/mental disorder, behavioral disorder, heart disorder, etc.)?
	<ul> <li>Academic grade level proposed insured functions at?</li> </ul>
	• If juvenile, is there a formal IEP?
	• Fully mobile without aids?
	<ul> <li>Able to live independently?</li> </ul>
	Currently taking any medications?
	• Any restrictions on work or activities?
Diabetes:	• Date of diagnosis?
A chronic metabolic disorder related to a deficiency in	• Type of diabetes?
insulin secretion which results in elevated glucose levels. Type 1, also known as insulin dependent or early onset	• Most recent hemoglobin A1C reading and date?
diabetes, is typically associated with more complications	• Any complications?
than type 2 which is usually diagnosed in adulthood.	• Height and weight?
Complications of diabetes include cardiovascular and kidney disease.	• Currently taking any medications?

Medical condition	Details for quote	
<u>Sleep apnea:</u>	• Date of diagnosis?	
Sleep disorder characterized by cessation of breathing for at least 10 seconds. Usually caused by upper airway obstruction, known as obstructive sleep apnea. If not properly treated, can lead to complications that include hypertension, risk of accidents due to daytime sleepiness and heart arrythmias.	<ul> <li>Date of most recent sleep study?</li> </ul>	
	• Type of treatment?	
	<ul> <li>If using CPAP or BIPAP machine, how many nights per week?</li> </ul>	
	• Height and weight?	
	Any motor vehicle accidents?	
Stroke/TIA:	• Stroke or TIA?	
Causes damage to the brain when blood supply is interrupted. Symptoms from stroke last 24 hours or longer and may include weakness on one side of body and trouble talking, eating or walking. A TIA (transient ischemic attack) is a brief interruption in blood supply with symptoms lasting 24 hours or less.	• Date of episode?	
	<ul> <li>Underlying cause if known?</li> </ul>	
	<ul> <li>Any long-term symptoms or limitations in daily activities?</li> </ul>	
	<ul> <li>Current or prior tobacco use?</li> </ul>	
	<ul> <li>Currently taking any medications?</li> </ul>	
Systemic lupus erythematosus (SLE):	• Date of diagnosis?	
A chronic inflammatory disease of the connective	<ul> <li>Type of treatment/medication?</li> </ul>	
tissue. It can affect any part of the body including	• Any limitations?	
the vital organs.	<ul> <li>Any complications/organ involvement?</li> </ul>	
Ulcerative colitis/Crohn's disease	• Date of diagnosis?	
These are also known as inflammatory bowel disorders. Ulcerative colitis is limited to the large bowel (lower Gl tract) while Crohn's disease can affect any portion of the Gl tract. Complications can include bowel obstruction (Crohn's) and increased risk of intestinal cancer (both Ulcerative Colitis and Crohn's).	<ul> <li>Frequency of attacks?</li> </ul>	
	• Date of last attack?	
	<ul> <li>Hospitalization or surgery?</li> </ul>	
	• History of anemia?	
	Currently taking any medications?	
Other medical conditions:	Name of condition?	
Use this for any medical condition not found above.	• Date of diagnosis?	
	<ul> <li>Any surgery or treatment required?</li> </ul>	
	Currently taking any medications?	

Review the common non-medical risks below with your client. If any do apply to your client, make sure to get their responses to answer the questions in the right column.

Non-medical risk	Details for quote
Aviation	• Type of license?
	• Total solo hours?
	Annual flying hours?
	• Type of aircraft?
	Instrument flight rating?
	• Date of last flight?
	• If commercial pilot, airline or non-airline?
	<ul> <li>If non-airline, specific type of flying (charter, air ambulance, crop spraying, etc)?</li> </ul>
	• Motor vehicle violations in past 5 years?
<u>Bankruptcy</u>	• Refer to Bankruptcy section of the <u>Underwriting</u> <u>guide</u> which covers chapter 7, 11 and 13 bankruptcies.
Criminal history	<ul> <li>Specific conviction(s), date(s)</li> </ul>
	• Felony/Misdemeanor?
	• Any incarceration? If yes, provide date of release.
	<ul> <li>Probation/Parole? If yes, provide date of full release. Any pending charges?</li> </ul>
	• Any alcohol or drug use history?
	• Any driving violations? If yes, provide details.
Driving record	• Violations and accidents in past 5 years, including dates?
	• Suspensions or revocations, including dates?
	<ul> <li>If DUI or DWI, any history of treatment for drug or alcohol abuse?</li> </ul>
