

Determining your guaranteed lifetime income potential

Lifetime income benefit annual withdrawal percentages (single-life option)

To calculate your income, use the following formula:

Effective: 12/1/2025

Net premiums x your withdrawal percentage = annual withdrawal amount

Use the tables on this flyer to match your age at contract issue with years elapsed since purchase to determine your withdrawal percentage. This percentage is determined by three things:

1. Whether you take income on a single- or joint-life basis
2. The number of complete years that have elapsed between contract issue and benefit election
3. Your age (or the younger covered person's age) on the contract issue date

| Years elapsed (between contract issue and benefit election*) | Age at contract issue | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
|---|-----------------------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|
